Southwest District: 2500 East Cork Street, Kalamazoo, MI 49001

Dear Customer

Thank you for your request for service. Attached you will find general procedures regarding your responsibilities to receive the type of service you requested.

THREE MAIN AREAS OF CUSTOMER RESPONSIBILITY ARE:

- SERVICE PAYMENTS
- SITE CONDITIONS
- ELECTRICAL INSPECTION

Keep the procedures to review as we proceed with designing your service and constructing the job.

For future reference, or any questions, please call 1-800-272-5123 or (616) 337-2274.

Sincerely

Customer Request Center

IMPORTANT - READ CAREFULLY

1. Your service entrance equipment should be located as marked "X" in the sketch shown at the left. If for some reason this is not possible, please call.
2. You or your electrician are responsible for obtaining all electrical permits and inspections before service connections can be made. Wiring should comply with all local and state wiring codes.
3. You are encouraged to install sufficient ampacity for both present and future needs. Adequate wiring is a good investment. Service entrance equipment should not be rated less than 100 amps.
4. Our electric service is planned to terminate on your premises at: (see Note 1 above).

Avoid planting trees directly below proposed service wires and thus avoid future conflicts.

If you have future plans for a swimming pool or building additions, the service wires should be designed to avoid future overhang. Call us if you anticipate any problem.

If additional information is required, please call the Consumers Power Company Energy Request Center.

Procedures for Obtaining Overhead Service

1. From the information you provided us, the location for your meter socket has been determined.
2. If you have requested service to a mobile home, you are required to set your own pole. Be sure your pole meets the criteria shown on the enclosed drawing.
3. Complete your wiring as shown in the enclosed drawing. You can obtain a meter socket, free of charge, at any of the locations on the enclosed list.
4. State law requires you obtain an electrical permit and inspection from your city, township or state electrical inspector. Please be sure to give the inspector your request number. Your inspector will call our Company after your wiring has been approved.
5. Your order will be placed in our construction schedule ONLY after we have received your electrical inspector's approval and any required costs have been paid. If your main breaker is off, you do not need to be home when we set the meter.
6. If you have requested the following types of service, please note these special requirements:
 - a. Temporary: For temporary service, the cost is \$150, nonrefundable. If we cannot serve you from an existing pole, extra costs will be communicated to you in advance.
 - b. Mobile Homes: To provide service to your mobile home, your well and septic system must be installed. A deposit will be required if you fail to meet the above conditions.
 - c. Construction required: If additional line work is required to reach your location, or other unusual circumstances exist, extra charges may be incurred. These charges will be communicated to you in advance of construction.
7. If you have underground facilities in the area where we must dig to install poles or guy wires, they must be marked.

You must stake the following:

- (a) well
- (b) septic field
- (c) sprinkler system
- (d) any underground wires, or other unusual facilities.
